BOSCH Installation / Operating Instructions
www.bosch.com

Water Wizard 600

Continuous Flow Gas Water Heater

This appliance must be installed in accordance with the manufacturer's installation instructions, AG 601, NZ 5261, AS3500.4.2 and all Local Water, Building and Gas Fitting regulations

To be installed and serviced only by an authorised person
This appliance is not suitable for use as a pool heater

The "authorised installing person" is responsible for:
1. Correct commissioning of the appliance.
2. Ensure and perform to the specifications stated on the rating label.
3. Demonstrate operation of unit to customer before leaving.
4. Hand these instructions to customer.

Failure to install this appliance in accordance with these installation instructions may void warranty

In the interest of continued product improvement, Bosch reserves the right to alter these specifications without notice

Send some photos so the internet can see the problem. Also take advantage of fixya expert assistance live. For a price, expert works with you while you work on water heater or any doityourself project. Fixya is always less expensive than a service call. How do I adjust the water temperature If water feels hot through some taps in the house, but not others, then there is a good chance your water pipes are not insulated, meaning that the heat from the water is escaping out through the pipes before it gets to the shower, for example. As far as I am aware, there is no way to manually adjust the water temperature of a Bosch 960 Water Wizard, it has to be done by a certified professional gas fitter. Recommendation Get a more uptodate gas water heater, that doesnt require a manual restart each time the pilot light goes out. The coupler is the bulb that sits ib the pilot flame If it doesnt heat up it will sense no pilot and shut the gas off. Good Luck, Ned The thermo coupler is that bulb that is in the pilot flame. Good Luck, Ned Its the little stick like thing that the flame heats up to tell gas valve to open. Off button on. Can push on button so can restart. Answer questions, earn points and help others. It's not only continuous flow water heaters which Bosch manufactured. The advantage of engaging one of our qualified technicians is that we will do everything in our power to have your hot water service repaired saving you thousands of dollars. Systems such as the Water Wizard 600, Water Wizard 780 and Water Wizard 960 can still be repaired today providing some vital components are still accessible. Other version of the Bosch hot water range such as the 10p, Bosch 13p and Bosch 16p are more of the recent range of the pilot light series and are also

repairable providing no corrosion has made itself present. These units are 6star energy rated and can be paired with your mobile phone or tablet

device. <http://er-cardiff.com/eurostyl/photos/comprar-plantador-manual-de-hortalizas.xml>

The advantage of pairing the system with a mobile device is that you can control the temperature being delivered throughout the entire home. In the event of a fault our service technicians can access all the information required to perform a comprehensive diagnostic of the problem and perform the required tasks to have the system working again. In locations such as Hahndorf, Stirling, Bridgewater, Piccadilly, Aldgate, Balhannah and Crafers where access to natural gas is not possible bottled gas is used or commonly known as LPG. The principals are the same just the working pressures of the gas components are set differently to cope with the differences in delivery pressure from the bottle. Most of the bottled gas is distributed out of some of the larger suburbs in the Adelaide Hills such as Mount Barker and transported through towns such as Oakbank, Lobethal and Woodside. As a guide a 45kg bottle of LPG last approximately 3 months for a family who use bottled gas for cooking, heating water and barbequing. He was very friendly and was able to fix the problem. His prices were very reasonable too. Thank you for your great service! read more I have since had Aaron unblock our drains three times since tree roots! and he is always reliable, gets the job done with no fuss and is a great bloke to deal with, highly recommended read more Got the job done, no hassles. Great quality work. Highly, highly recommended!! Worked efficiently. Explained all the costs clearly. A good professional service. Aaron did a great job and he explained everything really easily. I pushed the OFF button on Bosch water wizard 10p when pilot light went out, the OFF button will not come out now. I want to reignite. Please help Submitted 8 years ago.

<https://www.informaquiz.it/petrgenesis1604790/status/flotaganis18032022-1807>

Try depressing the light button on the far left. If it does not release it, you can unscrew the two phillips screws that hold the metal plate. This should reveal the slide mechanism. Push the

horizontal plastic element to the left. This should free the off button. Replace the metal cover and tighten back the screws. Ask Your Own Plumbing Question Was this answer helpful. Took a shower and noticed that I I have a gas water heater. Took a shower and noticed that I have no hot water. I went to check the water heater and noticed the drain value is dripping a little. The igniter sparks fine but will not light. I took the 4 screw out and removed the access plate. Bosch water wizard wont light despite following instructions. Ignition sparks but pilot wont light. Has been out of gas for some weeks and no connected to new gas bottle. Been away for 12days, just I have a Bosh water wizard 10P. Been away for 12days, just had a hot shower now only cold comes out. The pilot light has gone We have a bosch water wizard 10p. The pilot light has gone out and we are trying to relight it. The water keeps turning cold after a few minutes. asked 6 months ago Bosch Pilot Ignition I live in an extremely windy suburb and my Bosch W W p 10 constantly blows out can I have a battery ignition box connected to the hot water system Like Share More No answers Bill R asked 6 months ago Bosch Pilot Ignition how to relight a pilot light on an optiflow 20L professional hot water system. The 21e and 22e are practically the same, the 22e is just 22 litres per limit while the 21e is 21 litres per minute. Some alterations will have to be made, your installing plumber will be able to make the changes. If you need assistance with getting in touch with an approved agent, please contact us at 1300 30 70 37 any time between 730AM and

6PM AEST on a weekday. Like Report Razzak asked 2 years ago Bosch Pilot Ignition Old bosch hot water pilto ignition do not ignite. Any ideas Like Share More 2 answers Ronald K. 12 months ago My Bosch Optiflow 20 hot water system stays on when I am not using the hot water. I noticed when I walked past the unit and it was blowing out hot air nobody else was home. I had to turn it off at the power. The fan of the OptiFlow will always run for 3 minutes once a hot tap is turned off. If the unit is running continuously with no hot tap on, it is possible that there is a leak in your hot water line. If this is the case and you can hear water running through the unit with no hot tap open, we recommend that you shut off the water isolation valve to the unit and phone a plumber. We can assist you with getting in touch with an approved service technician at 1300 30 70 37 on a weekday any time between 730AM to 600PM AEST. Like Report PJW asked 2 years ago Bosch Pilot Ignition I have a Bosch hot water heater that has a button that normally lights up it's ofd and I have pressed it many times and it won't turn back on. They can be reached at 1300 30 70 37 from 8am to 6pm AEST Monday to Friday.

Otherwise, please feel free to use our contact form so we can get in touch with you Like Report Joy asked 2 years ago Bosch Pilot Ignition I have Bosch tf 400 8Gng gas hot water system and the pilot light keeps going off whats the problem. Like Share More 2 answers sparky 2 years ago I dont have the tf 400 but i hv the 10p water wizard.not sure if similar but ive had similar problems.what ive put the pilot light going out and the main burner going out after 2 minutes or so is that there wasnt enough air flow.i used a holesaw to drill out a 30 mm hole in line with the pilot so if my ignition wont light i can use a gas extended lighter and also propped up the glass cover where the buttons are half way and put a makeshift hood over these.this has been an excellent fix and hasnt gone out in 3 weeks.try this and if it doesnt work just cover hole back up and drop glass screen.good luck. Like Report sparky 2 years ago I dont have the tf 400 but i hv the 10p water wizard.not sure if similar but ive had similar problems.what ive put the pilot light going out and the main burner going out after 2 minutes or so is that there wasnt enough air flow.i used a holesaw to drill out a 30 mm hole in line with the pilot so if my ignition wont light i can use a gas extended lighter and also propped up the glass cover where the buttons are half way and put a makeshift hood over these.this has been an excellent fix and hasnt gone out in 3 weeks.try this and if it doesnt work just cover hole back up and drop glass screen.good luck. Like Report Sam asked 2 years ago Pilot Ignition 16P Water heater does not activate even though pilot light is on. Is the worn or damaged diaphragm the cause. How can I change it please. Like Share More 2 answers CLB 2 years ago Go get a Gas plumber. Like Report Steve 2 years ago Not sure, but all the buttons on my system jammed, so it looked like they were on but were literally stuck, i tried contact cleaner and everything from CRC to Inox but after the second unit and fifth call out in 12 months i repaced it with a Rinnai B20 Like Report Ron D asked 3 years ago Bosch Pilot Ignition How do you restart Ignition. Like Share More 1 answer Ivy M. 3 years ago Just Google it. Put in your model and there will be an online manual that you can look up. Like Report wen asked 3 years ago Bosch Pilot Ignition Hi. Im unsure how to light the pilot in my Boch 16H water heater. Gas is ok for cooktop and space heater. Tried to get info from manual to no avail. Please give me step by step instructions. Im single female 70 living alone. There should be two valves on the pipes outside the unit. Turn them both off for 20 seconds or so, then turn them back on. Done. The unit locksout if there is any air in the gas line. As its ignition is hydropowered there is no need for lighter or matches. I hope ur hotwater has already been restored, but if not, i hope this solves your prob. Good

luck. C. Like Report Dianne Thomas asked 4 years ago Pilot Ignition 16P I couldn't restart my Bosch 16P so I pushed the Stop button in and I need to know how to release the stop button please. Like Share More 1 answer Peng 3 years ago Had this same problem with my 16P just a short while ago. Was frantically trying to restart pilot but the off button I pressed by mistake would not pop up again Rang up their help line but the lady said nothing can be done but should call the plumber.

Was about to call plumber but in meantime read a useful reply from a guy who said he sprayed WD 40 and just depressed a few times and off button popped up again. In my case the off button popped up again when I depressed the pilot light button. Bosch products are excellent as this unit is 6 years old and has been trouble free. The attitude of their service and management however is another matter altogether. Hope this advice helps someone. Like Report Lauren asked 4 years ago Pilot Ignition 16P Hi, I have a Bosch 16P and the pilot goes out all the time. It has gotten worse. Is there anything you recommend or is it time to replace a new hot water system. Like Share More 1 answer Ivy M. 4 years ago Hi Lauren, Sorry, but beyond my knowledge. Google Bosch in your area and they are bound to have an authorised technician who could give proper advice. Like Report Clementine asked 4 years ago Bosch Pilot Ignition My gas hotwater system pilot light has gone out. I can't relight it and button showing the dot on it is jammed in. Please help Like Share More 1 answer Ryan Coleman 3 years ago These units need to be serviced every two years. I used WD40 in the and around the button. Seemed to solve the problem. Like Report Karen asked 4 years ago Pilot Ignition 10P I have purchased a property with a Bosch 10p HWS. The property has been vacant for 8 months. The only two Gas appliances at the property are gas hot plates and the HWS. Any suggestions please. As we understand this is not a desirable expense to incur, we encourage you to contact our customer support team on 1300 30 70 37 who would be able to assist in resolving your query. We look forward to hearing from you. Like Report Skinny asked 4 years ago Pilot Ignition 16P Pilot normal but when cold water flows the main burner dies down, extinguishes as second button is released. Water diaphragm seems like new. Any ideas appreciated. Whole unit seems in good condition model TF400 NG 1TR. The pilot light won't stay on.

Are both the wires connected. Like Report Saddle Saw 2 years ago The pilot needs to warm itself up for a while. Keep the button held in for about a minute until you see the colour of the flame change, then release slowly. If it goes out, try again. I'm no expert but I think the warmth of the pilot might actually draw that little bit of gas that keeps it going. Like Report Arun asked 5 years ago Pilot Ignition 10P Can I get replacement for dysfunctional 10p. Like Share More 3 answers Catherine 5 years ago You will need to ask Bosch as I am just a customer. Like Report Arun 5 years ago Bosch should declare 10p obsolete model and request all installers to stop selling. It's getting beyond the joke. Our team would like to work with you on resolving any performance problems you are currently experiencing with your 10P, so please ensure you outline how long you have had the unit for and also refer to this review upon contacting us. Can you advise how to release this button. Like Share More 2 answers Scott Robinson 5 years ago I have the exact same issue right now. Does anyone have an answer. Regards, Scott Like Report Scott Robinson 5 years ago Hi, I found the same issue in another forum. The forum suggested using WD40. I just tried this and it works. Just spray the WD40 around the edges of the button to try and get some oil into the back of the switch. I gave it a couple of pushes and it popped the button. Next time I will use graphite as WD40 has a tendency of gumming up making these issues worse in the long term. But for now I have hot water again. Whether you love or loath being in the kitchen, our community of reviewers have determined that out of almost 5,000 appliances on ProductReview.com.au, these are the best available! Nathan S. Nov 01, 2019 Best Fridges and Dishwashers in 2020. These large kitchen appliances are the backbone of your kitchen, meant to last you many years.

The initial cost of a fridge or dishwasher is high, so to make sure you're not buying a lemon, here are the best fridges and best dishwashers of 2020. ProductReview.com.au has affiliate partnerships.

We'll take you through step by step on how to easily relight Bosch hot water system, especially Bosch 10P. This allows the gas through to the pilot light. If it doesn't light, something has blocked up the injector and it needs a service. If it goes out immediately, it needs a service. This allows gas to go through to the main burner when the water is turned on. Hot water should start coming through. If it doesn't, it means the diaphragm has perished and it will need to be replaced. They have new ones made of silicone which are awesome. Check if there's any leak. The most important part that needs to be replaced is the gland sleeve. It is located between the gas chamber and the water chamber. If you do get water into the gas chamber, you will be up for a new hot water system. That's why this is important to keep an eye out for. Sometimes it may not have entered the gas chamber yet, but when there's water dripping onto the gland sleeve, over time it will stuff it up and it will need replacement. If you leave it for too long, you won't be able to service the hot water system anymore. Now, before we adjust the temperature of the water, here's something you should know. Therefore, the slower the water travels through the HWS, the more heat it will collect. Turn it anticlockwise. This will allow the water to flow through the unit as fast as possible. It's great in the summer time as the water is slightly warmer flowing into the unit. Your information will not be shared nor sold.
