Login to post Will the torque converter be compatible It will go down on its own, but will not lock. But the case is to manually lock It said to take the hoses of the valve the top two hoses are likely at the same place and 180 deg from each other. The last hose connector is perpendicular and at the bottom. It said to plug one of the top holes and apply pressure to the bottom hole while applying pressure to the bottom hole. Then you apply a vacume or suction to the open top hole. If you can pull air then the valve or casing is bad and should be replaced. This manual did not second refer to the E.G.R valve from the BPT. The BPT valve was under the Emissions control section. Once this valve has been checked it said to check the EGR valve connected close by. Similar test but air pressure was supposed to be more resistant or something, but may allow some air flow or something Chances are you might need a new BPT hose. This is a very easy and inexpensive fix. My check engine light was on for about 75,000 km before I replaced the BPT hose and since then the check engine light has never come on again. The Villager is still going strong at 375,000 km. bikerbcCodes PO403 and PO406 came up after I replaced the computer.
